

FOOTBALL

INTRODUCING THE NEW GENERATION OF NON-FILL TURF

GREENFIELDS MX NF

Key benefits:

- Reduced maintenance
- Great playability - natural ball behaviour
- Long term performance - heavy duty construction
- Easier to recycle - no need to remove infill

Engineered to meet FIFA Quality Pro standards, GreenFields MX NF provides a true alternative to 3G football turf systems.

Developed for long-lasting, high performance play, the strong thatch layer of fibres supports the player and provides grip. In addition, highly resilient SlideMax and Evolution fibres deliver natural ball behaviour. Patented woven technology forces the fibres to stand even straighter, ensuring the foot lands naturally on the turf.

A “lay and play” solution that is faster to install and easier to maintain. This non-fill product eliminates the need for infill decompaction or top up. Surrounding areas stay cleaner too as there is no migration of infill.

“

The good grip of the standing leg on this surface allows for optimal ball control.

”
